

Brother Visitors' Council of RELEM

The one-day working session of the Visitors' Council of RELEM was held at the Generalate in Rome on 10 October 2022.

In the morning, the Visitors and the entire General Council engaged in a "Lasallian Conversation" followed by the presentation of the "Leavening Project". This was followed by a question/answer session between the participants and the Council members.

The afternoon, on the other hand, was more focused on the preparation of the visit to RELEM by the General Council (between February and March 2023).

Visiting 'a Region' - and not just a District - is something new that the Council intends to implement starting with this next trip, for which objectives and modalities were shared. RELEM is a complex reality and two weeks already seem too short!

Making relevant choices is the real challenge.
